— **PLANTING INSTRUCTIONS** —

Peonies may be planted in spring or fall and should be planted three or four feet apart in a good, well-drained soil, in sun or partial shade, and away from roots of trees and shrubs. Plant the eyes not more than two inches beneath the surface, and in a hole large enough to accommodate the roots without crowding. Dirt in the bottom of the hole should first be firmed so that the roots will not settle. Mix a handful of bonemeal with the dirt around each root. This is usually beneficial to the plant, but not necessary. When planting in the fall, make a six-inch mound of earth over the newly-planted roots and remove the same in early spring. Ordinarily peonies do not like an acid soil.

TREE PEONIES

Tree Peonies are a low, many-branched shrub, growing three to four feet high, bearing giant-sized flowers in many colors. They have been grown in the Orient for centuries, where they gained the name "The King of the Flowers." The sparkle and beauty of tree peonies in full bloom are beyond description. They are beautiful, rare and hardy, and many are fragrant.

We are expecting to import about one hundred named varieties of tree peonies from the Orient this fall. Since these have not bloomed in our garden we are unable to guarantee them to be true to name. We are, therefore, offering them as mixed varieties only. They will be small plants which were grafted on herbaceous peony understock last fall.

They come in shades of white, pink, red and purple, and we will try to send colors of your choice.

We offer them for sale to you as follows: \$3.00 each, \$8.00 for three and \$24.00 for ten.
